PROFESSIONAL SUMMARY

Full-Stack Developer with 2+ years of experience building scalable web applications using React.js, Next.js, Node.js, PHP (Laravel), and MySQL. Proficient in both frontend and backend development, REST API integration, and responsive UI design.

PROFESSIONAL EXPERIENCE

Software Developer

January 2025 – Present

iNextErp Solutions Pvt. Ltd. (Noida Sector - 63)

- Engineer full-stack web applications using React.js on the frontend and Node.js with MySQL on the backend.
- Deliver scalable, dynamic features with a focus on performance, maintainability, and code reusability.
- Integrate REST APIs, form validations, and backend business logic for complex enterprise modules.

Web Developer

June 2024 – December 2024

Maxtra Technologies (Noida Sector - 67)

- Built web applications using PHP, Laravel, and phpMyAdmin for database management.
- Designed and maintained backend APIs while handling MySQL database operations.
- Created responsive user interfaces and managed asynchronous requests using AJAX and jQuery.

PROJECTS

iNext Online Portal | Next.js, JavaScript, Node.js, MS SQL

January 2025 – Present

- Architected complex stored procedures in MS SQL Server to handle business logic at the database level, reducing API response overhead.
- Exposed RESTful APIs consuming MS SQL stored procedures and wired them into the Next.js frontend.
- Engineered a reporting system for the ERP platform enabling dynamic, filterable, and paginated business report views.

In-House CRM Portal | Next.js, JavaScript, Node.js, MySQL

January 2025 – Present

- Constructed a comprehensive CRM portal to manage customers, sales pipelines, purchases, payments, and user permissions in one platform.
- Enforced role-based access control (RBAC) across modules and departments to secure data and workflows.
- Delivered dynamic data tables and tracking workflows for customer interactions, sales orders, and payment statuses via real-time API integration.

HR Management Portal | PHP, Laravel, AJAX, jQuery, MySQL

June 2024 – November 2024

- Built an end-to-end HR system covering the full employee lifecycle — onboarding, attendance, payroll, and exit management.
- Automated attendance tracking by wiring biometric/punching machine data imports directly into MySQL.
- Configured a cron job-based payroll engine to dynamically calculate salaries, deductions, and disbursements on schedule.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript, jQuery, AJAX, React.js, Next.js

Backend: Node.js, PHP, Laravel, CodeIgniter

Database: MySQL, MS SQL

Tools & IDEs: VS Code, Postman, Git, GitHub, GitLab

Concepts: REST APIs, JSON, MVC Architecture, Responsive Design

EDUCATION

Bachelor of Technology — Computer Science & Engineering

2024 – 2027

Maharaja Agrasen Himalayan Garhwal University, Uttarakhand

70% (Ongoing)

Diploma — Computer Science Engineering

2021 – 2024

PK University, Mathura

72%
